

INTRODUCING

ReCover

Reconstruction & Post-Surgery Solutions

Our new collection of imagecare products offers removable layers of soft 100% natural silicone that provide adjustable fullness and projection. A gentle and comfortable fit during the multiple stages of reconstruction, for post-lumpectomy use and for covering breast tissue that has changed due to radiation.

Model 822 | Shell

Ideal for the multiple stages of reconstruction

- Triangular shape provides overall coverage to restore symmetry
- Three superimposed layers offer adjustable fullness and projection
- Finely tapered edges create a seamless appearance under clothing
- Sizes S, M, L, XL

Model 823 | Overlay

Ideal for post-lumpectomy and post-reconstruction

- Oval shape provides several positional options to restore symmetry
- Two superimposed layers offer adjustable fullness and projection
- Finely tapered edges for a seamless appearance under clothing
- Sizes: M, L

Model 824 | Enhancer

Ideal for post-lumpectomy use

- Anatomically curved shape that contours to existing breast tissue
- Creates additional cleavage
- Finely tapered edges provide a seamless appearance under clothing
- Sizes: M, L
