

The Coolflex™ Series

20–50mmHg

Lightweight, breathable compression wear

Coolflex is a lightweight compression device, optimal for individuals with fragile or broken skin. Made of a non-stretch mesh material, the Coolflex transfers heat and wicks away moisture, leaving the skin cool and dry.

Ideal for both venous and lymphatic limb disorders, the garments are available in max sizing and can accommodate limbs that feature disproportionately small ankles with a larger calf.

Each Coolflex calf garment includes the unique, patent pending EZ-Close™ pressure system. The EZ-Close pressure system is positioned laterally, allowing the patient to apply the product without bending forward. The bands of the closure system are made to an optimal length, making them easy to grip and close using minimal hand strength and little dexterity.

The features of the closure system, along with the built-in guidelines for application, promote independence and encourage improved patient outcomes.

This product is patent pending.

Ideal for

- Chronic Venous Insufficiency
- Venous Leg Ulcers
- Fragile, sensitive skin
- Well-managed Lymphedema (Stage I or II)
- Lipedema

Color

Black

Most breathable

The Spacer Fabric® TR is designed to be highly breathable for cool-wearing comfort

One-handed application

The laterally positioned closure system makes one-handed application simple, even for patients with dexterity issues or those unable to bend forward fully

Innovative design

Durable, metal hook closures for maximum strength and durability

Coolflex Standard CALF & FOOT

Features

The Coolflex Standard Calf and Foot offers compression in the foot, ankle, and calf. The inelastic calf wrap is paired with the Coolflex Standard Foot and the non-compressive Basic Liner. Combined, the products create a complete lower leg compression system.

Includes

- Coolflex Standard Calf
- Coolflex Standard Foot
- 1 Pair of non-compressive Basic Liners

Product Selection Tip

Select this product for patients with active venous leg ulcers, recurring ulcers or those with a small ankle and large calf
