

Do your own repairs and modifications using these one-of-a-kind vinylite products.

4802 Vinylite Tape

This is a high performance product- thin yet tough. Three layers of specialty plastics are bonded together to form a material only 0.002" thick. This tape does not shrink, creep, or pull up like more common tapes currently used for vinyl repair, and it offers excellent durability. Vinylite Tape was developed for use in conditions where moisture is present, so it is waterproof and easy to clean.

Size: 4 rolls @ 6" W x 18" L.

Color: See color chart (Page 2).

4804 Formafoam Tape

This versatile 1/8" thick, padded tape will bond to vinyl. It can be used with Vinylite Tape (Item# 4802) for repairs or for building up areas of the helmet that need extra padding.

Size: 2 rolls @ 6" W x 36" L.

Color: Natural.

4807 Terry Tape

If you need a soft layer between our vinyl and your skin, try this Terry Tape. It sticks to our vinyl to create a soft surface without a noticeable difference in the thickness of the foam. Try it anywhere that our products make contact with skin.

Size: 2 rolls @ 6" W x 36" L.

Color: Blue.

4150 Stretch Terry Cloth

This poly-cotton blend of stretch terry cloth can be used to create a tougher surface or texture over foam.

Size: 36" x 45" Sheet.

Color: Gray.

4808 Moleskin Tape

This adhesive-backed Moleskin can be used to line any vinyl surface which might come in contact with sensitive skin. Adds softness.

Size: 6 Strips @ 3" x 11".

Color: Beige.

5015 Cover Alls

These adhesive foam discs are handy to have around. They can be placed on sharp corners or hard surfaces, to create an easier "gripped" surface, or coated in vinyl to create waterproof surfaces that are easily cleaned.

Size: Bag of 25.

Product Dimensions: 2 3/4" x 3 1/2" x 1/4" each.

Color: Beige.

Options: Foam only, or foam with Fabriccoat (see color-chart Page 2). Custom colors are available for a small upcharge, require up to 5-7 business days for fabrication, and are **NOT** returnable.
