- Provides Joint stability
- Significantly improved patient mobility and independence
- Improved gait length, velocity, & bio-mechanics
- Guardian Rehabilitator Swing Assist Technology
- Guardian Rehabilitator Pneumatic Condyles
- Mass Practiced Therapy

T-STRAP PRODUCT FEATURES

- Circumferential Support of the ankle
- Improved pronation/supination

Rehabilitator Pneumatic Condyle System
provides maximum stability while also
providing increased sensory motor
& proprioception

The **Elite Rehabilitator & Elite PRO**
facilitates heel-to-toe gait,
dorsiflexion of the ankle/foot
and leg extension in swing phase.
Most importantly, the uniquely
flexible footplate of the Elite
Rehabilitator encourages volitional
muscle firing to strengthen and
rehabilitate the lower leg.

An **Extention Swing Assist**
facilitates heel strike with gait,
significantly increasing quad firing
and incrementally strengthening
the leg over time to improve gait
biomechanics and gait efficiency.

Trimmable footplate for
custom and intimate fit
