

"Limber helped
me reclaim
portions of my life
that I had lost."

Heather, Charlotte, NC

The UniLeg

Ultra lightweight. Precision fit. Peace of mind.

The Limber UniLeg is the first fully 3D printed below knee prosthesis that is dynamic and durable

Inspired by Nature, Designed for Life

The Limber UniLeg brings style, comfort, and durable performance to below knee amputees.

Typically **40% lighter** than a traditional prosthesis, the UniLeg supports active lifestyles without sacrificing performance. Precision fit for each individual, the UniLeg provides **energy return** comparable to carbon fiber and comfort that allows for all day use.

Best of all, the UniLeg delivers peace of mind, allowing you to wear it everywhere without concern. Get it **dirty, wet, muddy, or sandy**; the UniLeg can take it. Just rinse it off or even pop it in the dishwasher.

Available in 9 **fun and vibrant colors**, each UniLeg will be as unique as you. Live actively and confidently with the Limber UniLeg.
