

Wrist Lacer™

wrist support

With the ease of application of the Med Spec Wrist Lacer, you don't have to worry about your patients being compliant. In addition, they will love the exceptional comfort and support the Wrist Lacer provides.

Ease of Application

The lace closure mechanism provides unparalleled ease of application. You only need one free hand to tension and fasten the lace closure. The stockinette sleeve prevents the thumb from catching the laces and provides padding between the laces and the patient's skin.

Adjustability & Immobilization

Malleable palmar and dorsal aluminum stays may be bent to the desired degree of flexion or extension. The blue palmar pad provides enhanced support by matching the contour of the depression in the palm.

Optimum Comfort

The anatomically contoured design and the adjustable thumb strap provide a comfortable fit and allow unrestricted motion of the fingers.

Indications:

- Carpal tunnel syndrome
- Wrist sprains or strains
- Post cast removal
- Post operative care

10 1/2" wrist & forearm support

8" wrist support
