

KNEE ROTATION ADAPTER

Knee Rotation Adapter enables users to turn the knee 360°. It is made for TF amputees and is to be placed directly above the knee.

The Knee Rotation Adapter is a non-invasive, reusable prosthetic device designed for single patient use.

It is made to be used with all Össur bionic and mechanical knees.

KEY FEATURES

- Enables rotation of the lower leg/prosthesis
- Easy Handling: push one button to start rotation
- Unit locks automatically in neutral position
- Activities in limited space are possible (e.g. driving a car)
- Eases daily activities (e.g. putting on shoes)
- Patient can move into complex combination postures they could not otherwise do (e.g. sitting with legs crossed)

User Information	
Amputation Level:	Transfemoral and Knee Disarticulation
Impact Level:	Low to Moderate
Maximum Patient Weight:	125kg (275lbs)

WEATHERPROOF
