ALWAYS HERE FOR YOU

Our friendly, experienced, solution-focused team is here to take care of you every step of the way.

When it comes to breast care, there's no such thing as one size fits all. That's why we're here to help you provide your customers with the right products to make their journey a success. Optimal care for them is our priority. Together, we are a strong team, helping women regain their confidence after breast cancer.

Our customer service department is here to:

- Take orders, and answer any specific questions you have about our products
- Help you solve problems
- Provide information regarding your order status, as well as shipment tracking details

Available

- By phone**
- Monday to Friday, 8:30 am to 6:00 pm at 1-800-741-0078
- Via email**
- usamoenacs@amoena.com

Reliable

- Same-day delivery of orders placed before 2:00 pm Eastern
- Delivery via trusted services with tracking capability

Simple

- No minimum order requirement
- Order confirmation sent via email
- Invoices and credit memos sent via email and available on B2B
- Exact delivery schedules provided for products that are currently unavailable

AMOENA – YOUR PARTNER IN BREAST CARE

For over 47 years, we've been working passionately to help women with breast cancer get their confidence back. Since 1975, we have been your competent partner in the field of breast care with the highest standards of quality, innovation and design. Let's help build the future and self confidence of your patients together.

THE AMOENA SOLUTION

To support women on their journey through breast cancer, we offer products adapted to all sorts of specific needs, right from the beginning of treatment. Thanks to our high-quality products, strong focus on innovation and commitment to using only the best materials, we guarantee your patients will be satisfied with our products. We're proud to support women along their journey—from diagnosis right up to the return to their everyday lives.

This is what we call the **Amoena Solution**

AMOENA'S COMMITMENT TO HIGH QUALITY

Amoena has stood for quality since 1975. All of our products are manufactured to the highest quality standards and perfectly adapted to the specific needs of women on their breast cancer journey. We are the trusted providers of over 15,000 stockists worldwide and have sold over 18 million breast forms since 1975.

A perfect fit

- Find the perfect fit with products designed to be worn together
- High fitting accuracy due to perfectly matched products
- Perfect look, maximum comfort

Smart sizing

- Thanks to our use of innovative materials and technologies, our products are suitable for most shapes and intermediate sizes
- Any small recurring fluctuations in size can also be accommodated

Tried-and-tested sizing system

- We use a precise sizing system, developed over decades of experience taking post-surgical body and breast measurements, as well as working with a wide range of different materials and technologies
- We develop all of our products alongside women who have undergone breast surgeries and adapt the fit of our products to meet their needs

Easy to use

- Our sizing system has been designed so that our products can be paired together in any combination
- Find the perfect fit in a few easy steps

Wide range of products

- Products available in many different styles and designs
- Wide range of sizes
- Solutions for patients' specific needs

Medical devices

- Our breast forms and shapers, post-surgical wear and scar therapy products, specially designed bras and swimwear range are all CE certified and therefore meet the MDR safety and performance requirements

OEKO-TEX® 100

- We use OEKO-TEX® 100 certified materials in all our textile manufacturing processes

Pollutant-free

- All of our products are latex- and nickel-free and do not contain any toxic substances

Sustainability

- Sustainable materials, including raw materials
- Wherever possible, we design our work processes sustainable

OUR QUALITY STANDARDS

CE marked

All Amoena's CE-certified products meet the requirements of EU regulation MDR 2017/745 as well as the German Medical Devices Implementation Act (MPDG).

ISO-certified

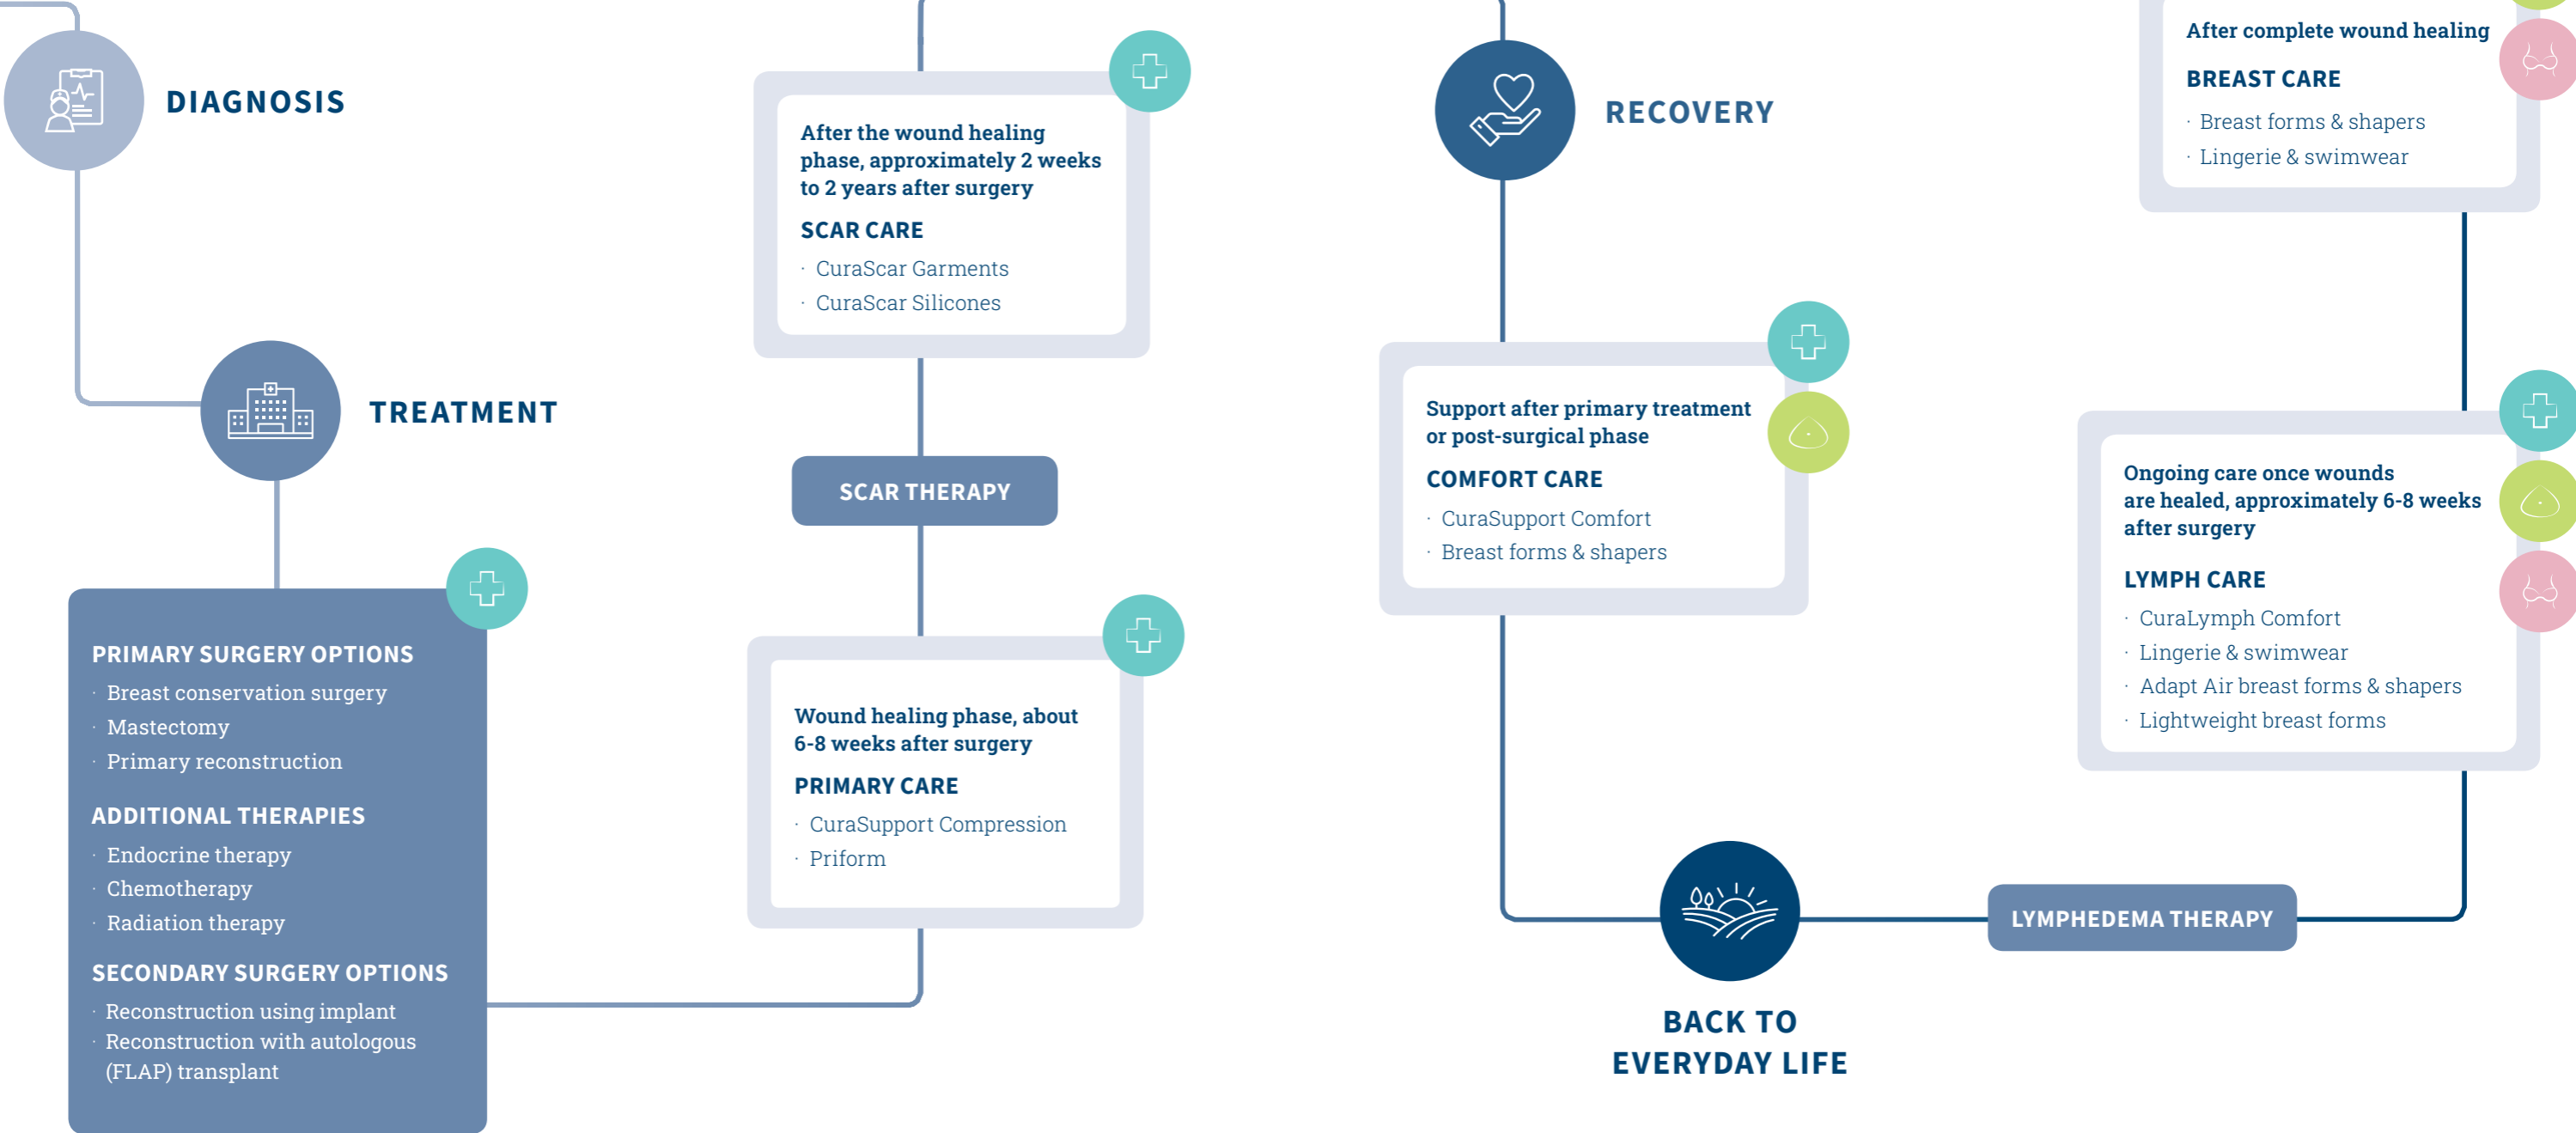

Amoena works with an integrated management system and is certified in accordance with ISO 9001/1401/13485.

Made in Germany

We develop and produce our breast forms exclusively on our premises in Raubling (Upper Bavaria), where our textiles are also developed and designed. Everything is created under one roof by long-standing, qualified employees, who strive every day to ensure our mutual success.

PATIENT JOURNEY

Every woman is different – as is every case of breast cancer. We understand the challenges you and your patients face. This is why all of our product solutions are designed to complement each other and work together perfectly. You can choose from a range of combinations to support your patient on every step of her journey. Amoena is with you to provide optimal care solutions every step of the way:

 **RECOVERY CARE**
WHERE HEALING BEGINS

 **BREAST FORMS & SHAPERS**
WHERE CONFIDENCE GROWS

 **BREAST CARE APPAREL**
WHERE EVERYDAY LIFE CONTINUES

AMOENA PRODUCT RANGE

How we meet patients' needs and requirements:
The right product for every woman.

You'll find the perfect product for each individual patient in Amoena's wide product range, specifically designed and adapted to patients' requirements and needs.

PREMIUM

Outstanding quality and innovative product developments.
Our products represent the best quality and most personalized care standards currently available on the market.

ADVANCED

Functional design using materials specially selected for their durability.
A focus on patients' needs using innovative manufacturing technologies.

BASIC

The excellent Amoena quality you expect at attractive prices.
Our products meet all your basic care needs without compromising on materials, workmanship, or design.

CURASUPPORT COMPRESSION

Seamless post-surgical bras

Our seamless compression bras have been specially developed for wear after breast surgery. They support the wound healing process by stabilizing and supporting the post-surgical breast. In addition, they protect sensitive skin and scar tissue and can ease post-operative edema and pain.

3 reasons to try our post-surgical bras

1. Comfortable design without troublesome seams, which supports the healing process without further irritating the skin.
2. Specially stitched areas that apply targeted pressure, encouraging lymphatic drainage and minimizing the risk of post-operative edema.
3. Varying pressure levels for use after different surgical methods to suit the patient's individual needs and requirements.

Post-surgical bras with a high cotton content

Our Theraport compression bra has been specially developed to wear during radiation treatment, including partial breast radiation (such as brachytherapy). These bras have a high cotton content and are made from material that can easily be cut to accommodate the catheter on either side without fraying. The material is also gentle on sensitive skin, ideal for patients undergoing radiation. Likewise, our post-surgical bras with a high cotton content have been specifically designed for wear after breast surgery. The pressure secures the post-surgical breast and tissues in place, which accelerates the wound healing process after surgery.

Leyla

LIGHT COMPRESSION

- A special compression zone supports the breast without applying direct pressure to its entire surface
- Specific pressure zones apply light pressure to the side and back sections to encourage lymphatic drainage and support the healing process

Sina

MEDIUM COMPRESSION

- Keeps the breast supported and secure with specific compression zones in the lower cup area
- Specific pressure zones apply light pressure to the side and back sections to encourage lymphatic drainage and support the healing process

Pamela

HIGH COMPRESSION

- Keeps the breast supported and secure by applying pressure to the entire breast surface
- High compression levels and specially stitched panels promote optimal lymphatic drainage

COLORS

FEATURES

- Seamlessly integrated pockets to securely hold breast forms and shapers in place
- Flexible
- Supports the surgical area
- Universal cups fit all cup sizes

Theraport

MEDIUM COMPRESSION

- Secures and supports the breast and wound site

COLORS

FEATURES

- Gentle on sensitive skin
- Supports the surgical area
- Medium compression
- Broad straps and underbust band to improve lymphatic drainage
- Integrated pockets for breast forms and shapers

FITTING TIP

Guaranteed to fit with seamless post-surgical compression bras

No need to try Leyla, Sina, and Pamela compression bras beforehand. Thanks to our innovative measurement system, the underbust measurement is enough to determine which size is required. The universal cups fully enclose the breast, due to the special processing technology used to make them.

CARE INSTRUCTIONS

CuraSupport Compression bras are designed to be worn 24 hours a day and only removed for daily hygiene purposes. In order to ensure constant, effective compression throughout the care period, compression garments should be washed on a daily basis. Patients should be advised to keep a spare garment for this reason.

See page 35 for sizing chart.

CURASCAR GARMENTS

Scar compression therapy

Our CuraScar garments are ideal for women who have undergone breast reconstruction using autologous tissue (FLAP surgery). The risk of excessive scarring at the site where tissue has been removed is significantly minimized by using a scar compression garment. Compression garments are used as part of a conservative therapeutic approach in scar therapy. When used early in the treatment phase, CuraScar garments can support the wound healing process and help to ensure a successful surgical outcome.

Compression in scar therapy

Compression in scar therapy involves applying pressure at a therapeutically effective level on the closed wound area. Even pressure applied to the surface of the wound reduces blood flow to the scar area and increases the elasticity of the tissue. As a result, the scarring appears flatter and less noticeable over time.

WHY CHOOSE CURASCAR GARMENTS?

1. Prompt availability and precise sizing.
2. High quality workmanship with no irritating seams due to innovative bonding technologies that support lymphatic flow.
3. Material can easily be cut to accommodate drainage tubes.
4. Breathable materials are gentle to skin and ensure maximum comfort, so they are more likely to be used consistently for the duration of treatment.
5. Garments apply medically effective pressure (20-23 mmHg) to support the scar healing process.

COLORS

FEATURES

- Side zippers make the garment easy to put on and take off

Overview

Image / Price Category	Product Name	Style / Color	Sizes	Features	Material

See page 35 for sizing chart.

EXPERT TIP

Compression and silicone are considered the gold standard in scar therapy, which is why we recommend combining all of our CuraScar garments with a corresponding product from our CuraScar silicones range. Please see the following page for more information on our CuraScar silicones.

FURTHER INDICATIONS

CuraScar garments are specially designed for use on tissue removal sites during the course of autologous breast reconstruction. They can also be used in numerous types of interventions for reconstruction and aesthetic surgery (e.g. skin tightening) to stabilize the surgical area, reduce scarring, and aid the healing process.

CARE INSTRUCTIONS

CuraScar garments are designed to be worn 24 hours a day and only removed for daily hygiene purposes.

In order to ensure constant, effective compression throughout the care period, compression garments should be washed on a daily basis. Patients should be advised to keep a spare garment for this reason.

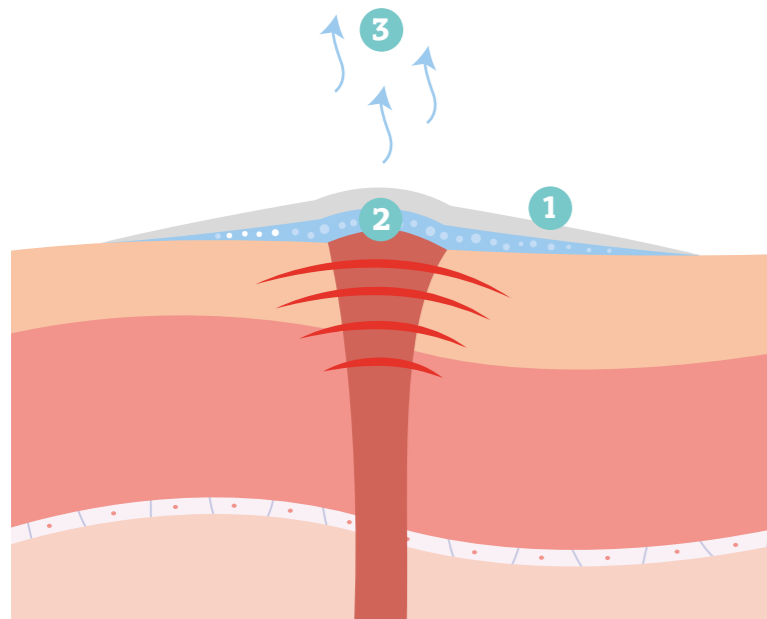

CURASCAR SILICONES

Scar compression therapy with silicone

Our CuraScar silicones are ideal for the treatment of scars following a surgical procedure as the use of silicone pads and compression significantly minimizes the risk of excessive scarring in the wound area. CuraScar silicones are used as part of a conservative/non-invasive therapeutic approach in scar therapy. When applied early on in the treatment phase (after wound closure), CuraScar silicones aid the scarring and wound healing processes and create optimal healing conditions for the skin.

Silicone in scar therapy

Silicone reduces water loss in the upper layer of the skin. A moist environment creates the ideal conditions for scarring, helping to make the scar smoother and reducing itching. Our breathable silicone pads also guarantee sufficient oxygen exchange.

Impact

1. **Silicone layer**
CuraScar Silicone
2. **Reduces water loss**
Keeps the scar area moist
3. **Breathable**
Oxygen can enter and exit

WHY CHOOSE CURASCAR SILICONES?

1. Breathable and highly elastic silicone that adapts perfectly to the body's contours
2. Completely self-adhesive
3. Reusable up to 12 weeks

FEATURES

- Can be cut to size individually
- Available with additional cover strips for better storage after cleaning

 ★★★ advanced	Mammilla Circles	012 Clear	Measurements: Interior Ø: 20 mm (.8") Outer Ø: 75 mm (3") 1 pack contains: 2 pcs	• Silicone strips for scarring in the breast area (nipples)	Polydimethylsiloxane, polyurethane Polyethylene protective cover strips
 ★★★ advanced	Anchors	013 Clear	Measurements: 230 x 145 mm (9" x 5.7") 1 pack contains: 2 pcs	• Silicone strips for scarring in the breast area (e.g. following reconstructive or aesthetic surgery)	Polydimethylsiloxane, polyurethane Polyethylene protective cover strips

EXPERT TIP

Silicone and compression are considered the gold standard in scar therapy. Therefore you should recommend combining the corresponding product from our CuraScar garment range for each CuraScar silicones product. Please see the CuraScar Garments (pages 24-25) for more information.

CLEANING INSTRUCTIONS

We recommend using Amoena Soft Cleanser on CuraScar silicones on a daily basis.

VIDEO TUTORIAL

CURASUPPORT COMFORT

Comfort bras and camisoles

Our comfort bras and camisoles are the ideal companion for patients in the post-surgical phase and on their journey back to everyday life. They are designed to offer additional comfort and be easy to wear.

After the wound healing phase (6-8 weeks after the operation), the skin and fresh scar tissue are still extremely sensitive. This is one of the reasons why it is often not possible for patients to opt for regular bra garments.

3 reasons to choose our comfort bras

1. Wide straps and soft closures that don't cut into the skin ensure maximum comfort
2. Front Closure makes it easy for patients with restricted movement to put the bra on and take it off.
3. Integrated pockets keep breast forms and shapers securely in place.

Emilia

COLORS

FEATURES

- Functional materials that are gentle on the skin
- Front closure
- Complete freedom of movement
- Integrated pockets for breast forms and shapers

CURALYMPH COMFORT

Lymph care concept

The Amoena Lymph Care Concept is ideal for patients after breast cancer therapy with mild lymphatic disease in the thoracic / chest area. Our care concept combines products from Recovery Care, Breast Care Apparel and Breast Forms and Shapers. These product solutions complement each other perfectly and support the whole patient.

Movement for well-being

After breast cancer treatment, especially if edema (swelling) occurs due to radiation or lymph node removal, it is crucial to keep moving. The right amount of exercise is essential – not too little and not too much. Exercise not only stimulates the circulation but also promotes lymphatic drainage. Flowing movements are the core of our lymph care concept; they reflect the design of the products. With these products, we want to motivate our patients to stay in the flow. The new CuraLymph comfort products, unlike conventional tops and bras, have special features that support her well-being.

COLORS

Light Sand

FEATURES

- Wide, padded shoulder straps for a high level of comfort, relief of shoulders, avoids fabric cutting into the tissue so that lymph flow is not hindered
- Higher cut sides and back for more stability and coverage and a higher level of comfort
- Integrated pockets to hold breast forms and shapers in place

Overview

Image / Price Category	Product Name	Style / Color	Sizes	Features	Material
 ★★★ advanced	Liane Top	44812 Sand/ Light Sand	S (32-36 A; 32-34 B, 32 C) M (38-40 A, 36-38 B, 34-36 C, 32-34 D) L (42-44 A, 40-42 B, 38-40 C, 36-38 D, 34-36 DD) XL (44-46B, 42-44 C, 40-42 D, 38-40 DD) 2XL (46 C, 44-46 D, 42-46 DD) 3XL (Spring '23)	<ul style="list-style-type: none"> • High level of comfort for patients with light edema or who are at risk • Textured fabric designed to create a light massage effect • Hip length top ideal for physical activities or sleeping • HCPC L8000 	56% Nylon 36% Polyester 8% Spandex
 ★★★ premium	Linda Wire-Free	44811 Light Sand	S (32-36 A; 32-34 B, 32 C) M (38-40 A, 36-38 B, 34-36 C, 32-34 D) L (42-44 A, 40-42 B, 38-40 C, 36-38 D, 34-36 DD) XL (44-46B, 42-44 C, 40-42 D, 38-40 DD) 2XL (46 C, 44-46 D, 42-46 DD)	<ul style="list-style-type: none"> • Innovative bonding technology with integrated cup pockets • Flat seams prevent cutting into the skin and support lymphatic drainage; pockets hold breast forms and shapers in place • Innovative SensElast® 3D technology on the side panels: fabric details under the arm that, when the wearer moves, create a light massaging effect, like gentle lymphatic massage • Higher cut sides and back give more support and therefore a higher level of comfort • HCPC L8000 	67% Nylon 33% Spandex

See page 81 for sizing chart.

IMPORTANT TO KNOW!

SensElast® is an innovative 3D technology that joins materials together without seams. A wide range of effects can be achieved, from seamless finishes to textured surfaces.

MEASURING TIPS

CuraSupport Compression

Only the underbust measurement is required to determine which size is required for our compression bras. There is no need to measure the chest circumference with our universal cup sizes, which stretch to fit every size because of their flexible material.

Compression Belt

The Amoena compression belt is positioned at the back so that it sits at the same height as a bra.

Anatomical Compression Belt

The belt sits over the cleavage at the front.

The Amoena compression belt is properly in place if the Amoena logo can be clearly seen on the upper right edge.

Size	cm / in	
	Underbust	
30	63-67	24¾-26½
32	68-72	26¾-28½
34	73-77	28¾-30½
36	78-82	30¾-32½
38	83-87	32¾-34½
40	88-92	34¾-36½
42	93-97	36¾-38½
44	98-102	38¾-40½
46	103-107	40¾-42½
48	108-112	42¾-44½
50	113-117	44¾-46½
52	118-122	46¾-48½
54	123-127	48¾-50

CuraSupport Comfort and CuraLymph Comfort

For sizing, see page 81 (lingerie sizing chart)

CuraScar Garments

- Ask the patient to undress. She can keep her underwear on if it makes her more comfortable.
- Ask the patient to stand up straight, avoid tensing her abdomen, and breathe normally.
- Make sure the measuring tape is in a horizontal position. The tape must not twist or slip.
- When measuring, make sure the measuring tape isn't too tight or too loose against the skin.
- Write down all the measurements you have taken and measure again.

BREAST CARE APPAREL

Our special garments are tailored to the individual needs of women who have had breast surgery. After breast surgery, a bra becomes more than just a piece of clothing – it becomes an active part of a woman’s personal healthcare routine. Along with providing optimal comfort, all of our products feature integrated invisible pockets on the inside. As essential accessories for breast forms, they are billable to most insurance with a prescription.

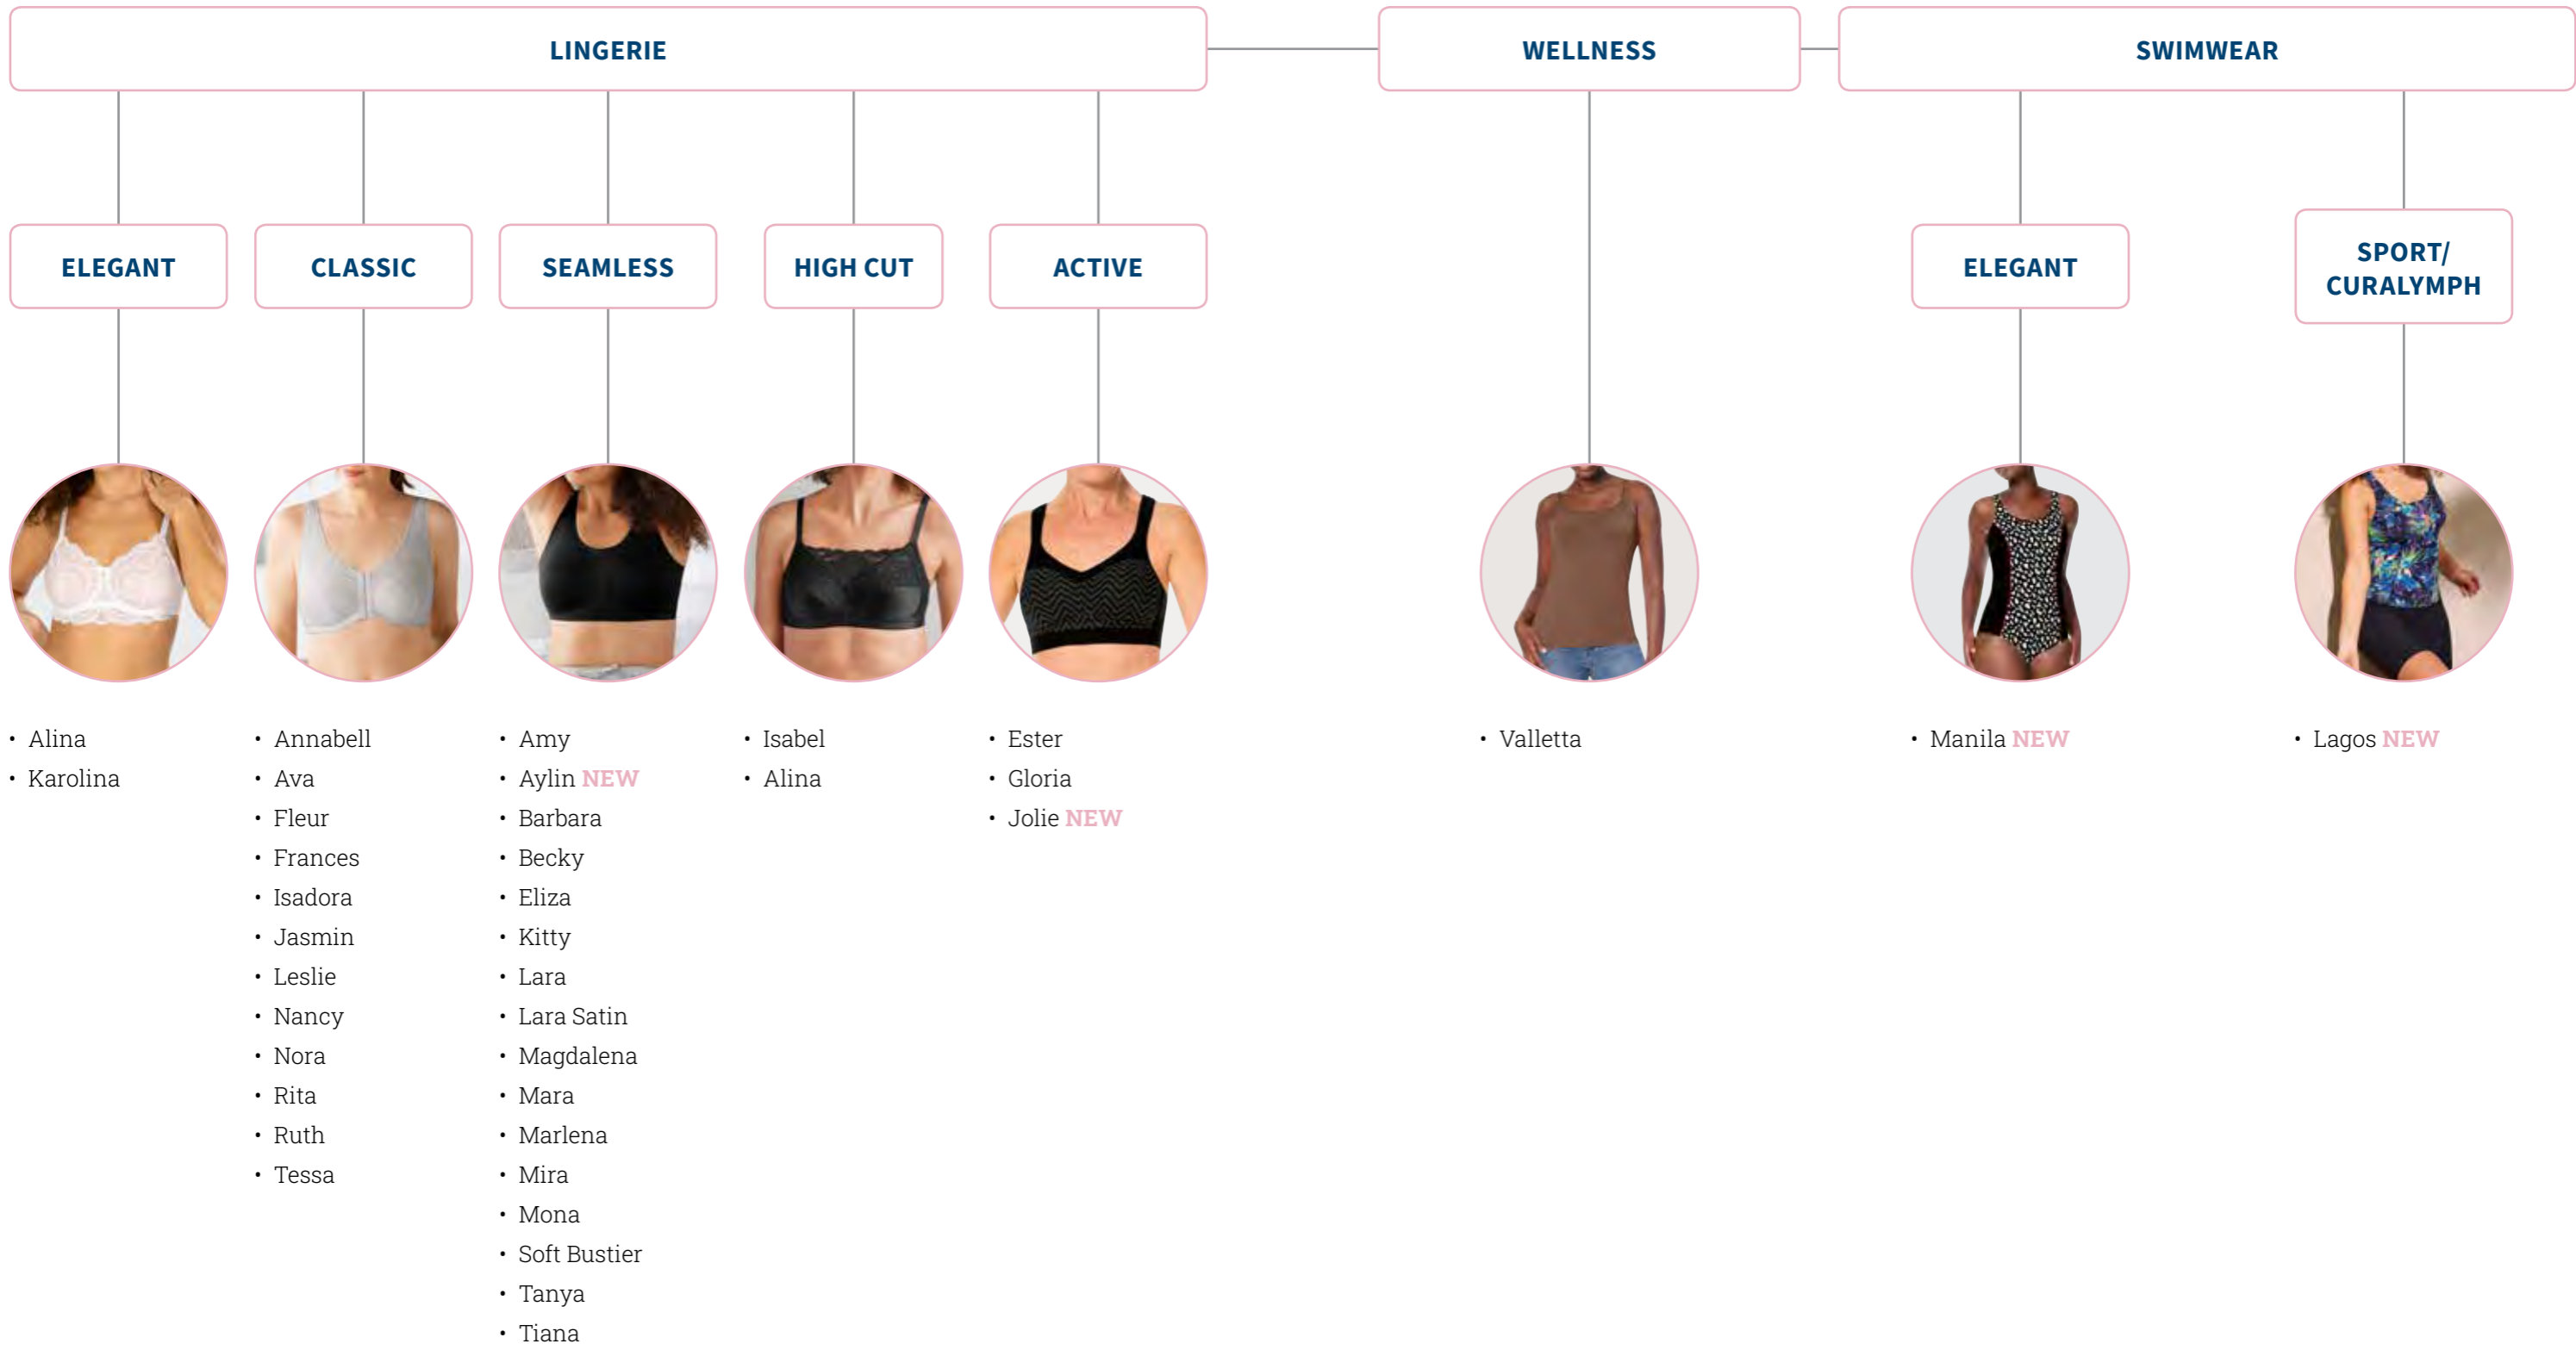

We use innovative materials and processing techniques in order to create a perfect look. We combine function and style, while ensuring a perfect fit in accordance with the highest quality standards.

EXCLUSIVES

AMOENA SPECIAL FEATURES

Soft, adjustable closures

- Increased coverage for larger sizes
- Lightly padded hook and eye fasteners for more comfort
- Front-closure designs for women with restricted mobility in the shoulder area

Comfortable, adjustable straps

- Supports breast forms and relieves pressure on the shoulders and neck
- Individually adjustable; straps become wider with increasing size

Cups provide the perfect fit with invisible pockets on both sides

- Pockets/cups fit perfectly with Amoena breast forms and shapers, helping to conceal any unevenness
- Pockets made from high-quality materials with numerous features for maximum comfort
- Elastic edges along the décolleté for additional security

High cut side panels and supportive, anatomically shaped underbust band

- Highly secure, very soft, optimal comfort
- Covers any visible skin irritation, scars or unevenness
- Most designs have a wider underbust band to ensure breast forms and shapers remain securely in place
- Certain designs have built-in support on sides (lightly padded or include flexible wiring) for additional lateral support

Comfortable, adjustable straps

- Supports breast forms and provides relief for the shoulders and neck
- Individually adjustable and increase in width for larger sizes

Specially integrated structures

- Integrated lightly padded cups hide unevenness; invisible, interior pockets on both sides
- Features the Amoena Wave Seam, a special curved lateral seam on the underband that supports Amoena breast forms, shapers and Aqua Wave breast forms
- The pocket has a side opening to prevent forms or shapers from falling out when swimming

High-quality, functional materials

- Stretchy material that doesn't become see-through, even when wet
- Recycled materials as part of our commitment to sustainability
- Technical materials with high UV protection (min. LSF 30+) chlorine-resistant, Xtra Life™ LYCRA®

Various types of fit for neckline, back and legs

- Subtle, flattering cuts suitable for all ages and figures
- Selection of different shaping effects: low, medium, and high
- Adjustable décolleté on some styles for an individual look
- Additional material along the closure to adjust the underbust width of bikini tops

MATERIALS

Our special bras and swimwear are made with only the highest quality materials.

OEKO-TEX®

- Standard 100 by OEKO-TEX® is one of the world's best known labels for textiles tested for harmful substances
- The OEKO-TEX® testing institute provides globally standardized certification of the safety of textile products in terms of human health
- Products that pass this test are permitted to bear the label "STANDARD 100 by OEKO-TEX® – Tested for harmful substances".

Organic Cotton

- Cotton constitutes around 50% of all textile fibers for clothing worldwide
- It requires up to 91% less water
- Controlled ecological cultivation without the use of chemical or synthetic fertilizers or pesticides

TENCEL™

- TENCEL™ is made from wood grown under controlled, sustainable forestry conditions
- It is made through an innovative, closed manufacturing process
- TENCEL™ fibers are very soft and breathable

Bamboo

- Bamboo is an amazing renewable resource
- It is an environmentally friendly material thanks to its lower water consumption, fast regrowth and pesticide-free cultivation

LYCRA® Xtra Life™

- Elastic fibers ensure a long-lasting fit and shape retention
- It is up to 10 times more resistant to the harmful effects of sun lotion, oil, heat and chlorine than unprotected Spandex

COOLMAX®

- Quick-drying COOLMAX® technology wicks moisture away from the body
- This special polyester allows the skin to breath offering a more comfortable feel
- Ensures a long-lasting fit and shape retention

ELEGANT

This feminine lingerie adorned with pretty lace, looks great and is comfortable too.

COLORS

FEATURES

- Eye-catching styles featuring plenty of lace
- Customizable styles that can be personalized
- Comfortable and adjustable with elastic straps
- Lightly padded hook and eye fastening for additional comfort
- Wide range of sizes up to 46 G

FITTING GUIDE

BREAST CARE APPAREL

The following pages provide guidelines and sizing charts that will enable you to provide optimal care.

Finding the perfect bra

Get the perfect fit in 3 easy steps. Here's how to determine the right bra size for your customer

1. Underbust measurement: While she is wearing a bra, measure around her torso where the bra band sits. This is used to determine the band size.
2. For a unilateral woman find the bra cup size by measuring from the middle of her chest, at her sternum, over the fullest part of her remaining breast to the center of her back, at her spine. (Bilateral women can choose their cup size, and it should be proportionate to the body.)
3. Use the corresponding sizing charts at right to determine the bra size.

These instructions are intended only as a guide. You may need to size up or down for the perfect fit.

SIZING CHART FOR

LINGERIE AND SWIMWEAR

Sizes based on body height 5'5" to 5'8"

1	Underbust measurement	24½-26¼	24¾-26½	28¾-30¼	30¾-32¼	32¾-34¼	34¾-36¼	36¾-38¼	38¾-40¼	40¾-42	42¾-44	44¾-46	46¾-48
	Corresponding band size	30	32	34	36	38	40	42	44	46	48	50	52

Overbust measurement in inches results in the corresponding cup size

PERFECT FIT – WHAT TO CONSIDER

Underbust band too tight

The underbust band feels too tight and uncomfortable. Try a larger underbust size or use an Amoena bra extender. Make sure the underbust fits properly: It should sit securely in place but still be comfortable and run in a straight horizontal line.

Underbust band too loose

The underbust band is loose and slides up the patient's back – this means there isn't enough support. Choose a smaller underbust size. Make sure the underbust fits properly: It should sit securely in place but still be comfortable and run in a straight horizontal line.

Bra straps are slipping down

The straps on the bra slide off the patient's shoulders. Generally, tightening the straps slightly should solve this issue.

Bra straps are digging in

In this case, the straps may need to be loosened slightly. Alternatively, if the patient has a larger underbust, a wider strap may be required. If this does not solve the issue, the underbust band may be causing the issue (see above).

Bra keeps sliding upwards

If the slightest movement causes the bra to slide up, this is a sign that the underbust band of the bra is too wide. Choose an underbust band one size smaller and a cup one size larger.

Bra cup digs in

If the cup squeezes or presses the breast in certain places, this usually means the cup is too small. Choosing a larger cup size will usually solve this issue.

PERFECT FIT – SISTER/CROSSOVER SIZES

Bra cup protrudes

If tightening the bra straps doesn't make the gaps or folds in the cup disappear, try a smaller cup size.

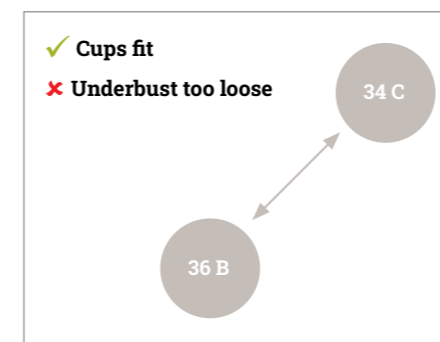

Bra underwiring digs in

For a perfect fit, the underwiring should follow the shape of the breast, gently enclosing it. The center of the bra should sit close to the body. If the underwire digs in, the cup is probably too small. Choose a larger cup size and, if necessary, a smaller underbust.

Alternative sizes

By way of example, an alternative size for a 34 B would be a 32 C or an 36 A. When trying a bra on, close the bra using the middle hooks.

BREAST FORMS AND SHAPERS

Amoena's breast forms and shapers feature unique technologies and are tailored to your customers' specific needs. We have everything you need to restore body symmetry following a breast-conserving surgery, a mastectomy, breast reconstruction, multiple biopsies or simply to balance out natural breast asymmetry. Our goal is to help women regain their natural, feminine silhouette, along with their self confidence.

And with over 47 years of experience, we know exactly what a woman needs after breast surgery: a breast form that's so natural and shapely, nobody will be able to tell it's there – and so comfortable, she won't be able to either. Our innovative breast forms and shapers are designed with all the challenges your patients face in mind, from certain medications and treatments, lymphedema and hot flushes, to uneven or sensitive scars. They are here to provide relief, keep the skin nice and dry, and fit snugly to the shape of the body. All of this makes Amoena the best solution you can offer.

BREAST FORMS AND SHAPERS CARE CONCEPT

Amoena breast forms and shapers are available in various weights:

- Standard weight: about 80-90% of the weight of a natural breast and the closest to a natural breast in terms of movement and feel.
- 20, 25 and 40% lighter breast forms reduce the pressure on the shoulders and are therefore particularly suitable for women with lymphedema, osteoporosis, tension in the neck and shoulder area, large breasts, or particularly active lifestyles.

¹ Energy is not available as a breast shaper

BREAST SHAPERS OVERVIEW

Amoena breast shapers balance out asymmetry after breast-conserving surgery, breast reconstruction, multiple biopsies, or in cases of natural uneven breast development. The soft silicone shaper fits snugly against the natural curves of the remaining breast tissue and fill the bra cup for a symmetrical silhouette, preventing tension, improving posture and correcting muscular imbalances.

AMOENA BALANCE

- **Invisible** – Thin edges ensure a natural fit between the shaper and the body
- **Versatile** – Various shapes, sizes and thicknesses available for optimal customization
- **Simple** – Required thickness can be determined using our simple, tried-and-tested cup difference method

AirChamber

Innovative Air Chamber Technology adapts easily
 Innovative Air Chamber Technology allows the volume to be adjusted for the best possible fit to a woman's individual needs, particularly if she has an uneven chest surface.

Comfort+

Our patented Comfort+ temperature-equalizing technology ensures constant, gentle temperature equalization between the body and the breast shaper, helping to prevent unpleasant heat build-up and perspiration.

Contact

Self-adhesive back provides security and ensures the most natural movement of the shaper
 Amoena Contact breast shapers adhere directly to the skin without the need for any additional adhesive materials. Adapts especially well to the movement of the body.

InTouch

Soft, natural feel with InTouch silicone material
 A special silicone formula combined with a soft, smooth film for a breast shaper that looks and feels as natural as possible.

Sizing chart, fitting tips and advice regarding the cross-cup difference method on page 94 and 95.

BALANCE SHAPERS SIZING

Find the perfect breast shaper in 4 steps

1. First, find **the right sized bra** for your patient (see the fitting guide on page 80).
2. Ask about your **patient's specific requirements** to determine which product range you need (see care concepts on page 87).
3. Determine which **shape** she needs (Oval, Delta, Ellipse or Special Varia).

4. Choose the **size** and **thickness** of the breast shaper

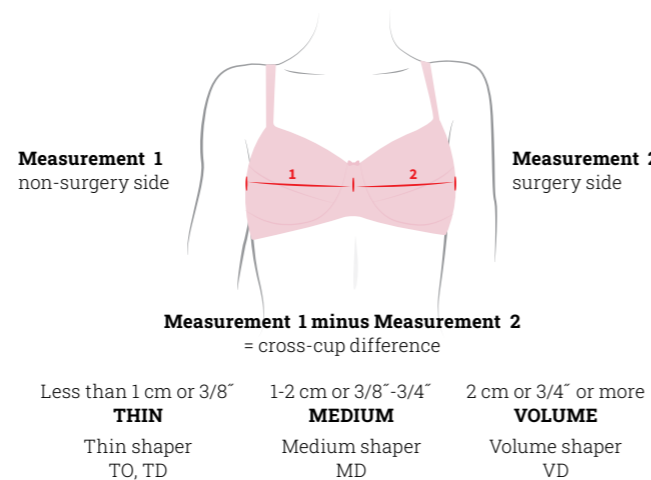

CROSS-CUP DIFFERENCE METHOD (CCD METHOD)

The cross-cup is measured from the center front of the bra (at the sternum) to the side seam.

1. Measure the fullest part of the cup on the non-surgery side (**Measurement 1**)
2. Measure the fullest part of the cup on the surgery side (**Measurement 2**)
3. Subtract measurement 2 (surgery side) from measurement 1 (non-surgery side)
4. The result is the cross-cup difference (CCD), which will help you to determine the thickness you need (Thin, Medium, or Volume)

TIP: Use the metric side of your tape measure and measure in centimeters (cm). This will give you the most accurate measurement.

BALANCE SHAPERS SIZING CHART

Find the right size for Oval and Delta breast shapers:

Cup size	Underbust measurement											
AA	32	34	36	38	40	42	44	46	48	50	52	
A	30	32	34	36	38	40	42	44	46	48	50	52

Basic

Innovative Air Chamber Technology adapts easily

Innovative Air Chamber Technology allows the volume to be adjusted for the best possible fit to the woman's individual needs, particularly if she has an uneven chest surface.

Our patented Comfort+ temperature-equalizing technology

Comfort+ technology ensures constant, gentle temperature equalization between the body and the breast form, helping to prevent unpleasant heat build-up and perspiration.

Integrated air circulation technology

A structure consisting of three-dimensional pearls on the back of the form ensures optimal air circulation and allows moisture to evaporate.

Self-adhesive back provides security and ensures the most natural movement of the form

Amoena Contact adheres directly to the skin without the need for any additional adhesive materials. Adapts especially well to the movement of the body.

Cosmetic – Natural look and feel

Combination of standard and lightweight silicone for a lighter breast form (approx. 20% lighter than standard) with ultra-soft feel that adapts well to the movement of the body.

Soft, natural feel with InTouch silicone material

A special silicone formula combined with a soft, smooth film for a breast form that looks and feels as natural as possible

1 OVERVIEW OF CUP FORMS

- 1 - Shallow:** Concave silhouette, natural shape with additional volume in the lower cup area and a flatter upper cup; women with a large underbust tend to have a shallow cup form
- 2 - Average:** Wider basic form, even silhouette, main volume concentrated in the upper and mid-cup area
- 3 - Full:** Convex silhouette, main volume concentrated in the upper and mid-cup area; women with a small underbust tend to have a full cup form

2 OVERVIEW OF FORMS

- S = Symmetrical:** Can be worn on the left and right side interchangeably
- A = Asymmetrical:** Specifically designed to be worn on the left or right side respectively. Extended form to compensate for missing tissue under the arm
- E = Extra:** Specifically designed to be worn on the left or right side respectively. Particularly suitable for women with a smaller cup size and fuller breast shape
- U = Universal:** Specifically designed to be worn on the left or right side respectively. Extended form to compensate for missing tissue under the arm or along the sternum (can be rotated accordingly)

* Light and Xtra Light forms have a more muted color

NATURA

Breast forms with temperature-regulating back.

NATURA double-layer breast form

-  Soft, matte polyurethane (PU) film and premium-quality silicone guarantee a pleasant feel
-  **Comfort+**
Reduces heat and perspiration behind the breast form

PARTICULARLY SUITABLE FOR WOMEN WHO:

- Have additional soft breast tissue (Natura 1S and 3E)
- Want or need a very light breast form (Natura Xtra Light)

NATURA triple-layer breast form

Soft gel back

Sits comfortably against sensitive scar tissue

or

Cosmetic

Combination of standard and lightweight silicone for a super natural look

PARTICULARLY SUITABLE FOR WOMEN WHO:

- Have sensitive scar tissue

NEW – CUSTOM-MADE BREAST FORM

The perfect fit, specially made according to your customer's needs

Amoena custom forms represent the leading standard in custom breast care and feature the latest 3D-scan technology to fit the individual requirements and body shape of each woman. This breast form is the ideal solution when it's not possible to find a good fit using a standard breast form, whether after a mastectomy or breast-conserving operation.

- **Individual fit:** The contour, back, and cup form are all specially tailored to her body
- **Color:** Choose between a lighter (ivory) or darker (tawny) skin tone
- **Nipples:** Choose the ideal nipple from our collection of adhesive nipples in various colors and sizes
- **3 weight options available:**
 - Standard: Regular weight
 - Light: ~25% lighter²
 - Xtra Light: ~40% lighter²

Select additional innovative product features to fulfill her needs

CHOOSE FROM THESE DIFFERENT OPTIONS¹:

Custom breast forms made from InTouch silicone

- InTouch silicone covered with a special coating for an extra soft and natural feel

Recommended for women who:

- Are looking for a basic, custom-made breast form for a symmetrical silhouette

Add:

Comfort+ temperature-equalizing back

- InTouch silicone covered with a special coating for an extra soft and natural feel
- Patented *Comfort+* technology reduces overheating and perspiration behind the form

Recommended for women who:

- Experience hot flashes due to menopause or medication

Add:

Air chamber layer for volume adjustment

- InTouch silicone covered with a special coating for an extra soft and natural feel
- Patented *Comfort+* technology reduces overheating and sweating
- Integrated Air Chamber technology for individual adjustment in the event of slight weight fluctuations or lymphedema, providing optimal flexibility when choosing a bra

Recommended for women who:

- Experience hot flashes due to menopause or medication
- Experience weight fluctuations (and the resulting fluctuations in cup size)
- Experience other size fluctuations due to lymphedema

Add:

Contact self-adhesive back

- InTouch silicone covered with a special coating for an extra soft and natural feel
- Patented *Comfort+* technology reduces overheating and sweating
- Self-adhesive back for relief of the shoulder and neck area

Recommended for women who:

- Experience pain in the shoulder/neck area
- Have lymphedema

¹ Depending on the size/shape of the custom-made breast form, some technologies may not be available.

² Compared to a breast form made of standard silicone of the same shape and size.

Advice: The custom-made breast forms are chargeable to Insurance/HCPC Code 37.35.08.6001 (Breast forms, individually manufactured)

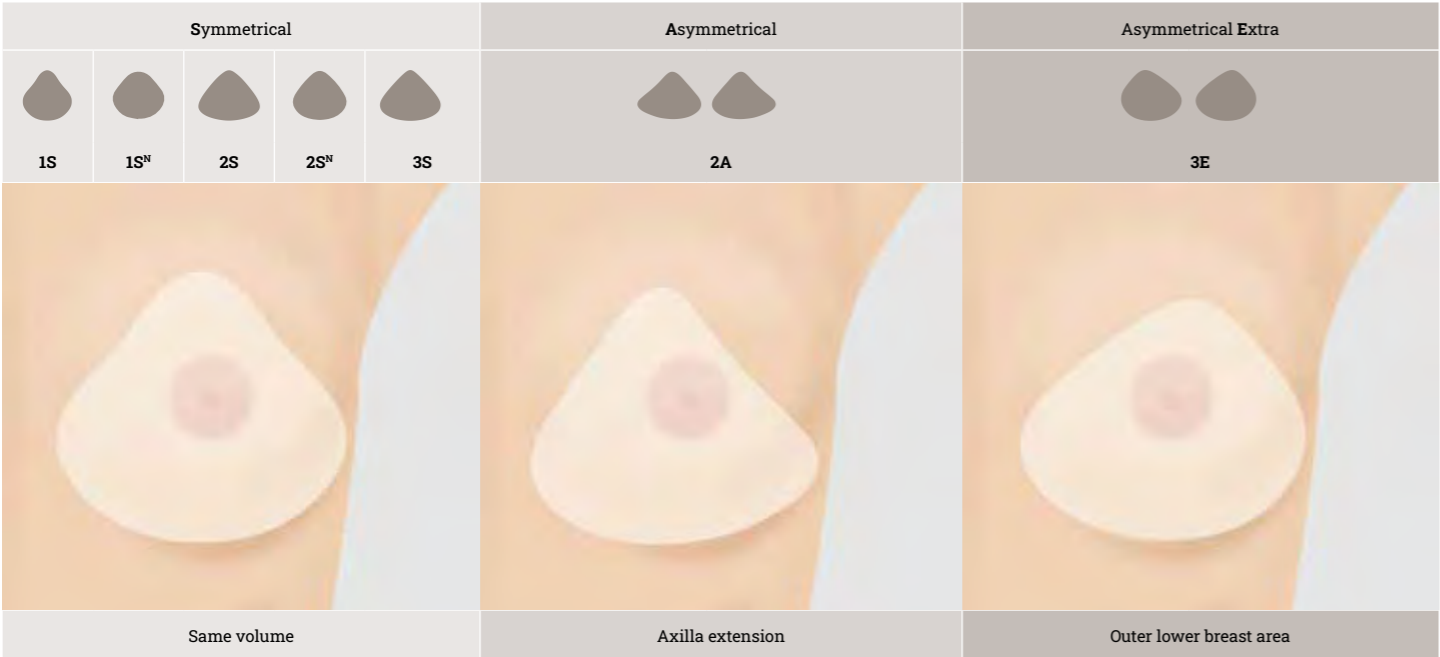

BREAST FORMS SIZING

Find the perfect breast form in 4 steps

1. First, find **the right sized bra** (see the fitting guide on page 86).
2. Ask about your **customer's specific requirements** to determine which product range you need (see care concepts on page 65).
3. Determine the **cup form** required for the bra (**1 = shallow, 2 = average, 3 = full**)
Cup form refers to the shape of the breast or cup size in the bra.

4. Determine the breast form shape (**S = Symmetrical, A = Asymmetrical, E = Asymmetrical Extra**)

TIP: For bilateral women, an asymmetrical form will provide her with the most natural looking shape and silhouette.

BREAST FORMS SIZING CHART

This table helps you find the **right breast form size** based on **bra size**. Try out the breast form with a T-shirt to find out whether you've found the right fit.

Example: If the customer's bra size is 42 C, this corresponds to a size 9 breast form

AMOENA PACKAGING

We develop our packaging with protection and presentation in mind: to secure the products and make your job easier.

Sturdy and compact

- Our materials are dimensionally stable and come in environmentally friendly paper boxes. In addition to that, they are covered in a special coating which allows you to safely stack them on top of each other, saving valuable shelf space.
- Our cardboard boxes are MDR compliant and come in 5 sizes, providing attractive and high-quality packaging for Amoena bras of every size. For additional safety, Padded are delivered on Amoena hangers in order to keep the shape of the cups intact.

Securely packaged

- The boxes for our breast forms are made from a sturdy, high-quality cardboard with a non-slip coating, which makes them easy to store. They come in 4 different MDR-compliant sizes and can be easily opened with only one hand. All our breast forms and shapers are equally well-protected and come in a sturdy mould. In addition, advanced and premium breast forms are delivered in a high-quality case.
- Please take care to store the breast form boxes horizontally.

AMOENA PACKAGING

The MDR-compliant labels contain all the necessary information clearly arranged and categorized for all of our product ranges.

- 1 Style number
- 2 Size
- 3 Product name
- 4 Reference number
- 5 Expiry date
- 6 EAN code
- 7 Medical device symbol
- 8 Notes according to MDR
- 9 Breast form symbol
- 10 UDI Code with plain writing
- 11 Serial number
- 12 OR code
- 13 Price category

Details clearly laid out

Clear hang tags on Amoena textiles provide information about strap variants, materials, and much more.

Hygiene in every step

Our Seamless Recovery Care items are made to the highest possible hygiene standards and are therefore suitable for clinical use straight out of the packaging. Following a pre-washing and disinfection process, the items are packaged and sealed in an airtight container. This means they can be put on the patient by the surgeon in the operating theatre.

AMOENA ACADEMY TRAINING AND EDUCATION OPPORTUNITIES

Amoena Academy educational opportunities support your business with a robust schedule of topics that can help you in your day-to-day work.

Our Introductory Fit Course provides training on how to match our products with different surgery types, gain practical hands-on fitting experience and master key fitting techniques. This course is approved by the national certification boards (BOC/ABCOP) as a Pre-Certification Fit Course for women – the first step to becoming a Certified Mastectomy Fitter.

We are also pleased to offer digital education throughout the year in Amoena Academy webinars. Product and business experts share their knowledge in convenient online courses which we record and maintain on our B2B website.

Register online and find more details about our courses at www.amoena.us/fitter

TRAINING ONLINE OR IN PERSON

Pre-Certification Introductory Fit Training Course	Business and Product Knowledge Webinars	Hybrid Advanced Fit Training Course
<p>The fitter's clinical experience, combined with her completion of an approved education program such as this, allows her to apply for certification through these nationally recognized boards:</p> <ul style="list-style-type: none"> • ABCOP (American Board for Certification in Orthotics and Prosthetics) – www.abcop.org • BOC (Board for Orthotists/Prosthetists Certification) – www.bocusa.org <p>The Pre-Certification Course is offered year-round, with virtual and in-person options; the course prepares you for the BOC and ABCOP certification exams. If you are already BOC or ABCOP certified, you will receive Continuing Education credits for the course. Details and registration at www.amoena.us/fitter</p>	<p>Business webinars are typically 1- to 1.5-hour courses. These occur online throughout the year, in an easy-access, relaxed format. Topics have included:</p> <ul style="list-style-type: none"> • Medicare Documentation • Merchandising Tips • Top 10 Ways to Get & Keep Your Money <p>Attendees can submit a certificate of completion to their certification board for Continuing Education credit.</p> <p>In the 1-hour Product Knowledge webinars, Amoena leadership and experienced fitters present on some of our most innovative, advanced products, like Adapt Air breast forms, or our Balance Shapers portfolio. These courses are an excellent way to refresh your memory on new products, and a great way to train your staff. The recordings remain online as an educational "library" on our B2B website.</p>	<p>Recommended for certified fitters, this course explores fitting solutions for a wide range of breast surgery types. Students build upon the Introductory Fit Course through an interactive presentation, interviews with surgeons, fitting observation, and hands-on practice. With this training, students are prepared to care for a diverse patient population, be a leader of best practices, fit a wide variety of surgery types, and grow their business.</p> <p>The Hybrid Advanced Fit Course has two parts: 3-4 hours of distance learning on your own time, and 4 hours of live instruction. The live instruction is offered either on Zoom or in-person. Details and registration at www.amoena.us/fitter.</p>

WHAT OUR ATTENDEES HAVE TO SAY ABOUT OUR TRAINING SESSIONS:

“ I really enjoyed the class. It was very informative and the instructor made it fun. Thank you.”
— Megan H. (Virtual Fit Course)

“ Even after 21 years as a fitter, this was the best... the virtual fitting course was informative and convenient. Great job!”
— MaryAnn I. (Virtual Fit Course)
