

## SAMMONS PRESTON MFC II UNILATERAL SHOULDER ORTHOSIS

The Sammons Preston MFC II Unilateral Shoulder Orthosis helps support weak shoulder muscles and strained tendons or ligaments. It limits shoulder motions and maintains proper humerus positioning to allow healing. It is made from Lycra spandex for stretchy, wearable support that's ideal following sports injuries.

### Key Features:

- Indications: weak shoulder muscles, strained tendons and ligaments
- Made from Lycra/spandex
- Hand-washable and air-dry for easy care
- Sizing based on mid-upper arm circumference
