

GlideWear™
TECHNOLOGY

Be Proactive, Not Reactive

The Tamarack Prosthetic Sleeve Protector.

A thin, durable layer under your suspension sleeve giving you longer lasting performance and all-day comfort.

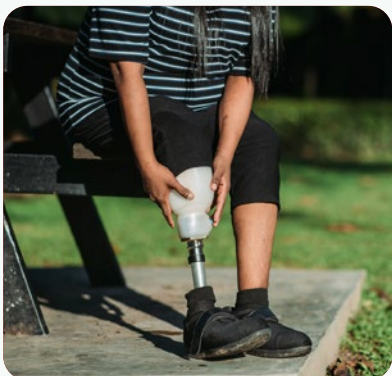

PROSTHETIC SLEEVE PROTECTOR

Skin breakdown and suspension sleeve failures rarely happen all at once. They build up one step, one bend at a time, until the vacuum vanishes and your day stops.

93%

of trial respondents would recommend it.

All-day comfort

Reduced skin irritation from rubbing and bending, so the hours you're wearing it stop being hours you're thinking about it.

Longer sleeve life

Coated GlideWear™ fabric extends the useful life of the outer sealing sleeve - and changes the math on how often it needs replacing.

Lasting protection

Guards against abrasion and shear forces at the brim edge, where sleeves fail fastest.
