

U-Pace

Single size - Universal Posterior AFO

Overview:

Trulife's U-Pace 'Universal Pace' is a one-size posterior orthoses designed to accommodate a wide range of patient anatomies.

With a single-size design available in both posterior-medial, an advantage not currently provided by competing products, and posterior-lateral strut configurations, the U-Pace AFO reduces the number of SKUs and minimizes stock requirements, while allowing customization to meet individual patient needs.

The footplate and height are adjustable for a customized fit. Its magnetic closure system enables easy one-handed operation, making it ideal for users with limited hand dexterity.
